

TIMELESS LIVING

THE ARCHITECTURAL KITCHEN

LEICHT®

Wood programme BOSSA in walnut
in combination with Fenix F 45 in
black slate.

THE KITCHEN

A LEICHT kitchen represents the lifestyle and architectural style of a home and the people who live in it. The materials, colours as well as the overall aesthetic impression also leave their mark on adjoining living areas. The aim: to create a holistic overall look in interior design with a homogeneous composition of materials.

L-Box cutlery system in nutwood. The narrow dividers of the cutlery system have been tailored to match the powder-coated steel frames, which are only 8 millimetres wide.

THE PULLOUT SYSTEM

With its clear and reduced lines, a filigree pullout system is an elegant signature, clearly restrained in its visual effect. Our M 8 system achieves this with a wall thickness of just 8 millimetres, supported by a dark colour scheme for the furniture and the system of fittings itself.

THE STYLISTIC ELEMENTS

Representative kitchens combine the homely and aesthetic components with the functional ones. Stylistic elements such as filigree shelves or large glass door systems help realise this aspiration. Slide-away doors transform the image of a kitchen in a special way. When closed, they create a flat, homely effect. Opened, they offer a full range of functions as well as access to otherwise concealed electrical appliances.

THE SIDEBOARD

As an elegant solution for a wide range of storage requirements, sideboards make a classic style statement – whether in the living room, dining area, bathroom or entrance hall. At LEICHT they are individually made to measure, open or closed, in a combination of different materials and surfaces.

THE WALL CLADDING

In a room whose walls are kept plain all around, all surfaces are of equal significance. However, in order to direct the focus of attention in the room and to divide and structure individual areas, it is advisable to highlight certain areas in particular. Thanks to its elegant and high-quality appearance, wood is an ideal material for wall cladding. Possible woods are oak, elm, chestnut, nutwood, walnut and ash.

THE DISPLAY CABINET

Elegant, filigree VERO glass display cabinets structure open rooms and areas and, at the same time, are decisive design elements. They showcase exhibited objects in an elegant light. Lightly tinted glass and optional interior lighting enhance the dramatic effect of the products presented there. VERO is available with a black, bronze or stainless steel frame and comes in a number of different dimensions.

THE BATHROOM

Modular and versatile cabinet solutions as well as a wide range of materials – the design freedom of LEICHT's planning scenarios also continues in the bathroom. Furnishing bathrooms is part of LEICHT's interior design expertise and combines the desire for beauty, function and individual bespoke solutions.

TIMELESS LIVING

Timeless architecture is all about reducing things to the essential. Stylistic elements and materials used deliberately and in moderation create a holistic spatial image. The programmes BOSSA, with vertical lines in walnut, and Fenix F45, with its ultra-matt surface in black slate, demonstrate how LEICHT can furnish rooms. A number of other material, colour and planning combinations are part of the LEICHT product portfolio.
